Summary

Motivated and detail-oriented B.Tech Computer Science Engineering (3rd Year) student with a strong foundation in data structures, algorithms, and software development. Proficient in programming languages such as C and Python with hands-on experience in web development and database management systems. Passionate about problem-solving, learning emerging technologies, and building scalable applications.

Experience

Python Developer Intern

May 2025 – June 2025

SkillDzire – Hyderabad, India

- Developed custom Python modules to extend functionality of existing software, meeting unique client needs effectively.
- Developed standard procedures for testing and validating software.
- Designed and developed software systems based on initial project requirements.

Skills

Python Programming	HTML
SQL Database Management	CSS
Data Structures & Algorithms (DSA)	JavaScript
C Programming	

Education

Bapatla Engineering College – Bapatla, AP

Bachelor of Technology in Computer Science and Engineering

2027

Projects

Currency Converter Using Python

- Developed a real-time Currency Converter application using Python and the forex-python library to fetch live exchange rates.
- Implemented input validation, exception handling, and modular code design to ensure reliability and maintainability.

GenAI-Powered Agriculture Query Resolution System

- Developed a Generative AI-based Agriculture Query Resolution System to provide intelligent, context-aware answers to farmers' queries.
- Implemented semantic search using vector embeddings and FAISS for efficient similarity matching and fast information retrieval.
